

ACT

We understood that this issue is not a short term one and thus, there needs to be actions that last over the years.
one such initiative was taken by our group as we announced a post of an Aqua Leader in our school who would take up initiatives and spread awareness about the issues.

On the basis of the activities performed, Ishat Kumar Jha of class 6th was given the position for this year.

we also made a website to help people understande
the cause and the possible solutions-

GREETINGS FROM THE AQUA STRATEGISTS,

Water is the most valuable natural resource as it is essential for human survival and life on earth. However, the availability of freshwater for human consumption is highly under stress because of a variety of factors. This crisis of water scarcity is most visible in India as well as in other developing countries. It is time for the world to come together and conceptualize towards saving water for the world and the future generations.

We are a team of students from Blue Bells Model School, Gurgaon (India). We are working on an ICT Seagulls Project-19 on the topic - 'Water Problem Faced by the World' for which we are conducting a survey to understand the opinion of the people and circumstances prevailing on the issue in the world.

ICT Seagulls

aquastrategists

We, the Aqua Strategists decided to take this agenda beyond this project and have begun to organise visits in other schools to spread awareness and take up fun activities to impart the knowledge of water conservation.

To initiate, we took up our own school and talked about the water crisis with the students. Our school witnessed a workshop by the Isha foundation Volunteers of the campaign Save Soil. We interacted with them and discussed how are issues are interconnected. The workshop involved some engaging activities and an ICT Seagull adress.
